

## Sodium bicarbonate – Bicar Tec 27/50

**General description:** Bicar Tec 50/125 is a white crystalline powder, alkaline reaction, sparingly soluble in water.

**Qualitative parameters of the product:**

Parameters	Units	Guaranteed
NaHCO <sub>3</sub>	%	min. 98,0
Free flowing density	g/l	800 - 1300
Particle size		
< 0,5 mm	%	min. 75
< 0,16 mm	%	max. 10

**Packing:** It can be packed in 25 kg PE bags, 40 bags on one-way pallet (1000 kg net) wrapped around by PE film.

**Applications:** In the paper manufacture, in the leather and chemical industry, environmental protection (flue gas cleaning, chemical neutralization, water treatment), detergents and cleansers manufacture.

**Storage:** Store in covered dry places, in undamaged original bags at temperatures to 35°C and humidity 30 to 70%.

**Date of update:** 31. 01. 2012
