

Sodium bicarbonate – Bicar Tec 50/125

General description: Bicar Tec 50/125 is a white crystalline powder, alkaline reaction, sparingly soluble in water.

Qualitative parameters of the product:

Parameters	Units	Specification
NaHCO ₃	%	min. 98,0
Free flowing density	g/l	900 - 1100
Particle size		
< 1,25 mm	%	min. 80
< 0,315 mm	%	max. 10

Packing: It can be packed in 25 kg PE bags, 40 bags on one-way pallet (1000 kg net) wrapped around by PE film.

Applications: Flue gas cleaning in hazardous waste incinerators, in the chemical industry, plastic foaming manufacture, detergents and cleansers.

Storage: Store in covered dry places, in undamaged original bags at temperatures to 35°C and humidity 30 to 70%.
