

Silpo 8

Chemical name: Silpo 8

General description: Silpo 8 is a mixture of sodium chloride and calcium chloride, white to gray crystals and coarse – grained granules, well soluble in water.

Specifications:

Parameters	Units	Guaranteed	Measured	Methodology No.
NaCl	%	min. 81,0	YES	Pp3_1.25
CaCl ₂	%	min. 8,0	YES	Pp3_1.25

Packaging: 25 kg PE bags with anti - skid protection, 40 bags on one-way pallet (1000 kg net) wrapped around by PE film or laminated big bags (1000 kg net).

Applications: It is used as for the winter maintenance of sidewalks and roads to release compacted snow and icy ground. Compared with an ordinary road salt the material SILPO 8 effect is much higher. The SILPO 8 product eutectic point is -15°C, while the road salt is only effective to -5°C.

Storage: Store in covered dry places and in original bags.
