

## Sodium bicarbonate – feed grade, granules

**General description:** Sodium bicarbonate – feed grade granules is a white coarse-grained substance, alkaline reaction, sparingly soluble in water.

### Qualitative parameters of the product:

Parameters	Units	Guaranteed
NaHCO <sub>3</sub>	%	min. 99,0
Na	%	min. 27,0
Loss on drying	%	max. 0,25
Pb	mg.kg <sup>-1</sup>	max. 10
As	mg.kg <sup>-1</sup>	max. 2
Cd	mg.kg <sup>-1</sup>	max. 2
pH (1% aqueous solution, 20°C)	%	8,00 - 8,60
Bulk density	g/l	min. 800
Particle size		
> 1,60 mm	%	max. 10
1,60 - 0,25 mm	%	min. 80
< 0,25 mm	%	max. 10

**Packing:** It can be packed in 25 kg multilayer paper bags with PE filling, 40 bags on one-way pallet (1000 kg net) wrapped around by PE film.

**Applications:** As an feed additive (feeding mixtures and premixes, acidifier), or to supplement feed ration directly on the trough, especially for cattle and other farm animals.

**Storage:** Store in covered dry places, in undamaged original bags at temperatures to 35°C and humidity 30 to 70%.

**Date of update:** 31. 01. 2012
